Infant Mortality Rate* (2010)

Indicator: Number of infant deaths (before age 1) per 1,000 live births

Source: National Vital Statistics System

<http://www.cdc.gov/nchs/deaths.htm>

About this Indicator: Rates are infant (under 1 year) and neonatal (under 28 days) deaths per 1,000 live births. Infant deaths are based on race of decedent; live births are based on race of mother. Indicator includes data for all 50 states, DC, and territories (Puerto Rico, Virgin Islands, Guam, American Samoa, and Northern Marianas). The National rate excludes data for Puerto Rico, Virgin Islands, Guam, American Samoa, and Northern Marianas. Populations used for computing death rates are postcensal estimates based on the 2000 census.

Heart Disease Death Rate (2010)

Indicator: Age adjusted rate of heart disease deaths per 100,000 population

Source: NCHS National Vital Statistics System (NVSS)

<http://www.cdc.gov/nchs/deaths.htm>

About this Indicator: Rates were calculated per 100,000 population. Age-adjustments and populations were calculated using postcensal estimates for years 2001-2009 and 2010 census counts. The National rate excludes data for Puerto Rico, Virgin Islands, Guam, American Samoa, and Northern Marianas. NVSS deaths from diseases of heart, codes include (I00-I09, I11, I13, and I20-I51)

Stroke Death Rate (2010)

Indicator: Age adjusted rate of stroke deaths per 100,000 population

Source: NCHS National Vital Statistics System (NVSS)

<http://www.cdc.gov/nchs/fastats/stroke.htm>

About this Indicator: Rates were calculated per 100,000 population. Age-adjustments were calculated using postcensal estimates for years 2001-2009 and 2010 census counts. NVSS Deaths from Stroke (cerebrovascular disease), codes include (ICD 10 I60-I69).

Suicide Death Rate* (2010)

Indicator: Age-adjusted deaths due to suicide/intentional self-harm) (per 100,000 population)

Source: National Vital Statistics System
<http://www.cdc.gov/nchs/deaths.htm>

About this Indicator: Intentional self harm ICD-10 codes: *U03, X60-X84, Y87.0. Indicator includes data for all 50 states, DC, and territories (Puerto Rico, Virgin Islands, Guam, American Samoa, and Northern Marianas). The National rate excludes data for Puerto Rico, Virgin Islands, Guam, American Samoa, and Northern Marianas. Rates are calculated using postcensal estimates based on the 2000 census for years 2001-2009 and 2010 census counts.

Homicide Death Rate* (2010)

Indicator: Age-adjusted deaths due to homicide/assault (per 100,000 population)

Source: National Vital Statistics System
<http://www.cdc.gov/nchs/deaths.htm>

About this Indicator: (ICD-10 codes *U01-*U02, X85-Y09, Y87.1) Indicator includes data for all 50 states, DC, and territories (Puerto Rico, Virgin Islands, Guam, American Samoa, and Northern Marianas). The National rate excludes data for Puerto Rico, Virgin Islands, Guam, American Samoa, and Northern Marianas. Rates are calculated using postcensal estimates based on the 2000 census for years 2001-2009 and 2010 census counts.

Drug Poisoning Death Rate (2010)

Indicator: Rate of drug poisoning deaths per 100,000 population

Source: National Vital Statistics System
<http://www.cdc.gov/nchs/deaths.htm>

About this Indicator: NVSS Deaths from Poisoning deaths involving Opioid analgesics, ICD-10 codes include X40–X44, X60–X64, X85, or Y10–Y14, as an underlying cause of death. Rates were calculated per 100,000 population using postcensal estimates for years 2001-2009 and 2010 census counts.

HIV Diagnosis Rate (2010)

Indicator: Rate of persons diagnosed with HIV infection per 100,000 population

Source: CDC HIV Surveillance Report

<http://www.cdc.gov/hiv/topics/surveillance/resources/reports/index.htm>

About this Indicator: Diagnoses of HIV infection refers to laboratory-confirmatory evidence of HIV infection cases reported to CDC annually. The estimated rates of diagnoses of HIV infection are based on data from 46 states and 5 territories (American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands) that have had confidential name-based HIV infection reporting for a sufficient length of time (i.e., since at least January 2007, and reporting to CDC since at least June 2007). This figure does not include persons living with HIV who have NOT been diagnosed (20% of all persons living with HIV). Rates are per 100,000 population based on 2009 population estimates, and are statistical adjusted to account for reporting delays, but not for incomplete reporting.

Hepatitis B (2009)

Indicator: Number of new cases of acute hepatitis B (per 100,000 population)

Source: National Notifiable Diseases Surveillance System (NNDSS)

<http://www.cdc.gov/hepatitis/Statistics/index.htm>

About this Indicator: Incidence is based on the number of acute cases reported to the National Notifiable Disease Surveillance System (NNDSS). Acute hepatitis is defined as acute illness with a discrete onset of symptoms (e.g., nausea, anorexia, fever, malaise, and abdominal pain) and jaundice or elevated serum alanine aminotransferase (ALT) levels.

Hepatitis C (2009)

Indicator: Number of new cases of acute hepatitis C (per 100,000 population)

Source: National Notifiable Diseases Surveillance System (NNDSS)

<http://www.cdc.gov/hepatitis/Statistics/index.htm>

About this Indicator: Incidence is based on the number of acute cases reported to the National Notifiable Disease Surveillance System (NNDSS). Acute hepatitis is defined as acute illness with a discrete onset of symptoms (e.g., nausea, anorexia, fever, malaise, and abdominal pain) and jaundice or elevated serum alanine aminotransferase (ALT) levels. For acute hepatitis C, elevated ALT levels are defined as >400 IU/L.

Central Line-Associated Bloodstream Infection- Standardized Infection Ratio (CLABSI-SIR) (2010)

Indicator: Central Line-Associated Bloodstream Infections -Standardized Infection Ratios

Source: National Healthcare Safety Network (NHSN);

<http://www.cdc.gov/hai/national-annual-sir/index.html>

About this Indicator: Based on healthcare facilities currently report using NHSN in all 50 states, D.C., and Puerto Rico. In HAI data analysis, the Standard Infection SIR compares the actual number of HAIs in a facility or state with the predicted number based on the baseline U.S. experience (i.e., standard population), adjusting for several risk factors that have been found to be most associated with differences in infection rates. SIRs are not reported for states with fewer than 5 facilities reporting CLABSI data to NHSN. SIR data is provided by facility type. All locations includes data collected from Intensive/Critical Care Units (ICUs), wards and Neonatal Intensive Care Units (NICUs). Critical Care includes only ICUs. Ward (non-critical care) locations include stepdown, specialty care areas (including hematology/oncology, bone marrow transplant), and LTAC locations (or facilities). NICU, which includes Level II/III and Level III nurseries, reports data for both umbilical line and central line associated bloodstream infections as CLABSIs.

Adult Obesity (2011)**

Indicator: Percent of Adults (age 18+) who are obese (BMI > 30)

Source: Behavioral Risk Factor Surveillance System 2011

<http://apps.nccd.cdc.gov/BRFSS/list.asp?cat=OB&yr=2011&qkey=8261&state=All>

About this Indicator: Includes all 50 states, DC and territories (Guam, Puerto Rico, and the U.S. Virgin Islands). National data based on median state prevalence of these 54 areas (median %=27.8).

Note: * Data prior to 2011 is not directly comparable to previous years of BRFSS data because of the changes in weighting methodology and the addition of the cell phone sampling frame.

** The BRFSS 2011 data should be considered a baseline year for data, as it reflects combined landline and cell phone data and changes in weighting methodology.

Source: Behavioral Risk Factor Surveillance System 2011

About this Indicator: Percent is based on a subset of persons having been told by health professional that they have high blood pressure. Data includes all 50 states, DC and territories (Guam, Puerto Rico, and the U.S. Virgin Islands). National data based on median state prevalence of these 54 areas. (median %=77.7)

Note: * Data prior to 2011 is not directly comparable to previous years of BRFSS data because of the changes in weighting methodology and the addition of the cell phone sampling frame.

** The BRFSS 2011 data should be considered a baseline year for data, as it reflects combined landline and cell phone data and changes in weighting methodology.

Child Vaccination Coverage* (2011)

Indicator: Percent of children aged 19 to 35 months receiving the recommended doses of DTaP, polio, MMR, Hib, hepatitis B, varicella and PCV.

Source: National Immunization Survey (NIS)

<http://www.cdc.gov/vaccines/stats-surv/nis/default.htm#nis>

About this Indicator: ACIP recommended series of vaccinations for children aged 19 to 35 months include at least four doses of diphtheria-tetanus-acellular pertussis (DTaP), at least three doses of polio, at least one dose of measles-mumps-rubella (MMR), at least three or four doses of Haemophilus influenzae B (Hib) depending on product type received, at least three doses of hepatitis B antigens, at least one dose of varicella, and at least four doses of PCV. In 2009, the full series was modified to include 3 or 4 doses of Hib vaccine (depending on product type received), which differs from the 2007 and 2008 full series included 3 doses of Hib vaccine.

Population Estimates

Indicator: Intercensal Estimates of the Resident Population for the United States

Source: U.S. Census Bureau, Population Division

<http://www.census.gov/popest/data/index.html>

About this Indicator: Estimates are based on Vintage 2011 (April 1, 2010 to July 1, 2011) files. 2010 data reflects the 2010 census counts. Population estimates include all 50 states, DC, and Puerto Rico. National estimates are calculated based on estimates of births, deaths, and net international migration. These estimates do not reflect 2010 Census Count Question Resolution (CQR). The race categories mandated by the Office of Management and Budget's (OMB) 1997 standards: White; Black or African American; American Indian and Alaska Native; Asian; Native Hawaiian and Other Pacific Islander.
